PROFESSIONAL SUMMARY

Third-year B.Tech CSE (AI) student and Java backend developer building REST APIs with Spring Boot and PostgreSQL. Built a Dockerized task manager API and a Python job-discovery prototype with 47 unit tests and CI. Reached Round 2 of the EY National Case Challenge (1,000+ teams). Seeking a backend internship.

EDUCATION

PSIT, AKTU 2024 – 2028

B.Tech Computer Science & Engineering (AI Specialization)

SKILLS SUMMARY

Languages	Java, Python, SQL
Data Formats	JSON
Frameworks	Spring Boot, Spring Data JPA, REST APIs, JUnit, Swagger/OpenAPI
Databases	PostgreSQL
Tools	Docker, Docker Compose, GitHub Actions, Git, GitHub, Maven, VS Code, Linux command line
Concepts	Object-Oriented Programming, Collections Framework, Exception Handling, basic JSON serialization and deserialization

PROJECTS

Task Manager REST API | Repository

Java 21, Spring Boot, Spring Data JPA, PostgreSQL 17, Docker Compose, Swagger/OpenAPI, JUnit

- Built a Spring Boot REST API with five endpoints for creating, retrieving, updating, and deleting tasks, persisted to PostgreSQL through Spring Data JPA and verified by six JUnit tests.
- Added request validation and centralized error handling in a global exception handler, so missing tasks and invalid requests return explicit error responses.
- Defined the application and PostgreSQL as two Docker Compose services and documented all endpoints with Swagger/OpenAPI.

Opportunity Network OS | Repository

Python, REST APIs, JSON, Unit Testing, GitHub Actions, Git

- Built a rule-based eligibility screen that checks each job listing for graduation year, location fit, work authorization, and experience level, and ranks saved jobs by priority.
- Built a Python job-discovery prototype that pulls public Greenhouse job listings through their JSON API, filters them with 22 keyword and 11 exclusion rules, removes duplicates, and stores results in JSON.
- Wrote 47 unit tests covering filtering, deduplication, and eligibility logic; GitHub Actions CI runs them on every push.

ACHIEVEMENTS

EY National Case Challenge – Round 2 2024

- Reached Round 2 among 1,000+ competing teams.

EY Techathon – Round 1 2024

IIT BHU CaseX Competition 2024

IIT ISM Forecasting Competition 2024

CERTIFICATIONS

Blockchain Basics – Cyfrin Updraft 2026

Introductory course on blockchain fundamentals.

Database Structures and Management with MySQL – Meta Coursera, Sep 2026 · Grade 85%

Database design and management with MySQL.

MySQL for Data Analytics and Business Intelligence – Meta

Using SQL to query and analyze data for business intelligence.
